## REMARKS

The figures of births and deaths shown in this statement for week ending the 21st April, 1956 relate to 195 towns with an estimated population of 27,548 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 62% of the total number of towns representing 66% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 16,466 and 7,133 representing birth and death rates of 31.1 and 13.5 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 154 towns with an estimated population of 21,527 thousands. Information about Assam, Bihar, Delhi, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 61% of the total number of towns representing 64% of the

total population is covered. The number of birth and deaths recorded in these towns were 13,624 and 6,047 representing birth rates and death rates of 32.9 and 14.6 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of the population.

(b) *States (Part B).*—The data here relate to 41 towns with an estimated population of 6,017 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 63% of the total number of towns representing 74% of the total population is covered. The number of births and deaths recorded in these towns were 2,842 and 1,086 representing birth and death rates of 24.6 and 9.4 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
